RE: FW: EPA comments on 2012 Draft IR - request for Kenai River turbidity data

Jill Gable to: Stevens, Timothy S (DEC) Cc: "Gilder, Cindy J (DEC)", "Grant, Drew (DEC)" 09/11/2012 03:04 PM

Hi Tim,

Thanks for letting me know. So I guess then I need the data (which Drew is sending), the report (is that included with the raw data?) and the peer review of the report. Is there anything else that would have been taken into account when making the listing decision? If so, I'll take that too. Thanks everyone.

jill

Jill,

I will verify with our contractor that over saw the peer review, but I believe the peer review was just on the information contained in the report and did not include a review of the data itself. With that said, reviewers did have an opportunity to address the methodology used to determine data outliers.

Thanks Tim and Drew. If/when possible, we would also like to take a look at the peer review of the data, as I assume that did, or in the future will, play a role in a listing decision. Thanks.

Subject: RE: EPA comments on 2012 Draft IR - request for Kenai River turbidity data

Drew,

In response to EPA comments on the 2012 IR I have created a folder containing all the raw Kenai River turbidity data collected during the 2008-2010 time period. The turbidity data can be found in the following folder on the statewide S drive:

\\\\An-svrfile\\\groups\\\Water\\WQ\\\NPS\\\Waterbodies\\Kenai\\ River\\\Turbidity\\EPA\\ submittals_2012 IR

The files in this folder contain all the raw turbidity data collected by the KWF either under contract or grant during the 2008-2010 time period. The actual raw files we received from KWF contain other WQ parameters in addition to turbidity - the other WQ parameter data were removed. No turbidity data points have been removed (contains all turbidity data including outliers).

Tim

Hi Drew,

Here are EPA's comments. Thanks so much.
